## EXPERIENCE

### SkillFitness LLC, Minneapolis, MN — *Mobile Solutions Developer*

July 2016 - PRESENT

I'm the one and only Android, iOS, Web, and Backend developer.

### SkillFitness LLC, Minneapolis, MN — *Android Consultant*

June 2016 - July 2016 (1 month)

I was contracted to bring the SkillFitness platform from being an iOS exclusive, to being cross platform with Android.

### Ricco Solutions LLC, Bloomington, MN— *Lead Android & iOS Dev*

June 2013 - July 2015 (2 years)

I was an intern, developing various applications such as CoupCash.

### Jimmy John's, Minneapolis, MN — *Sandwich Artist*

November 2012 - January 2013

I made sandwiches, online orders, did some cashiering, etc.

### Lush MOA, Bloomington, MN — *Stocker*

June 2015 - July 2015

My first job, doing stock in the back room. I got my first nice smart phone while I was here!

## EDUCATION

### University of Wisconsin-Stout, Menomonie, WI

August 2014 - June 2015

I only attended for a year. I took many high level classes due to already having skills, such as Computer Science II, Data Structures & Algorithms, and Calculus.

## SKILLS & PLATFORMS

Android Design & Development

iOS Design & Development (not preferred)

Web Design & Development (HTML, CSS, JavaScript…)

Backend Development (Node.js, ASP.NET…)

Playing the drums (I love music!)

Snowboarding

## PROGRAMMING LANGUAGES

Java, JavaScript, HTML, CSS, Kotlin, Objective-C & Swift, C++, C#, Python, and probably others.

## SPOKEN LANGUAGES

English

Mandarin Chinese (I'm a bit rusty)

**Central Senior High School,** St. Paul, MN

August 2010 - June 2014

I graduated from high school here. I took many classes for credits, such as Computer Science, Web Design, and Digital Imaging.

PROJECTS

**Polar Dashboard** — *A dashboard template*

Polar Dashboard is a dashboard template used by many Android themers (people who make icon packs, widget packs, etc.). It's open source on GitHub!

**Polar Request Manager** — *A request management service*

Polar RM is an icon request management service that acts as a companion to Polar Dashboard. It's a subscription-powered service. It runs as a subdomain on my site: https://polar.aidanfollestad.com

**Cabinet** — *My most popular project, no longer published*

Cabinet was a very, very popular file manager for Android that I made. It began to take too much time out of my life so I had to stop maintaining it and unpublish it.

**Nock Nock** — *A simple app to monitor your web servers*

A simple app that monitors your web servers on an interval to make sure they are up and running. Has some cool validation features too. It's on Google Play and GitHub.

**PhotoAffix** — *Stitch multiple photos into one*

A simple app I made because people like to stitch multiple framed screenshots into one photo when shared on social media. It's on Google Play and GitHub.

**Boid for Twitter** — *A Twitter client from back in the day!*

This was one of the first *major* projects I worked on. I worked on a small team with people from the UK as the lead developer. You can find info about it by searching the name on Google.

**Material Dialogs** — *A popular library for developers*

Material Dialogs is a library I made to solve backwards compatible Material Designed dialogs on all Android versions. It has a very easy-to-use API. It's on GitHub, with over 7,000 stars.

### *There are quite a few other projects and apps by me*

Please check out my website and GitHub page!
